DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 22 December 2009 has been entered.

2. Claims 59 and 60 are pending. Claims 37-58 previously pending and withdrawn from consideration, were cancelled in an Examiner's Amendment on 21 September 2009.

Information Disclosure Statement

3. The information disclosure statement filed 22 December 2009 has been considered.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3766

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 59 and 60 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent no. JP05-12118.

In regard to claims 59 and 60, the above reference application recites a method for graphically displaying waveforms of electrocardiogram data. It is an object of the invention to correct the amplitude and baseline of an waveform on a display if it has been judged that the waveform becomes obscured or considered to be out of the predetermined waveform display area, paragraphs 14-18 and 63-69. It is considered that the referenced paragraphs of the disclosure describe the display position correction process of the claimed invention.
